

THE INVITATION

An extraordinary summer in Brazil.

Leave your mark. Bring home more than memories.

AI-generated concept visualization inspired by Pelourinho.

Want to spend your summer in Salvador, Brazil, while the city hosts matches of the 2027 FIFA Women's World Cup—creating immersive exhibits in a UNESCO-listed historic center, connecting with researchers and industry professionals, being featured as a contributor in a VR book, and building a portfolio of exhibits that will be installed for public use and help bring new life to the city's historic downtown?

Then UF in Brazil could be your next great adventure.

All majors welcome. No VR experience required.

June 6-August 1, 2027 | Eight weeks | Six UF credits

CREATE / CONTRIBUTE / SHOW YOUR WORK

What if buildings could talk?

Apply human-centered computing to immersive experiences and exhibits at SENAI CIMATEC Digital e Criativo in Pelourinho, Salvador's UNESCO-listed historic center. Work with Brazilian collaborators on its past, present, and future, contributing to local revitalization efforts.

Explore Afro-Brazilian heritage, the history and legacies of slavery, living religious traditions, and capoeira. Your exhibits will remain at the SENAI creative/cultural location in Pelourinho or another SENAI location in Salvador.

Artists. Architects. Designers. Engineers. Programmers. Historians. Storytellers. Bring your perspective - and choose how you contribute.

BUILD A PORTFOLIO OF APPLIED WORK

Your personal page at ufinbrazil.mixed.group will be built with guidance tailored to your field and career goals: your contribution, a case study, photographs, a demonstration video, and feedback on your final presentation.

Concept cover and mockup.

Be featured in a book.

Use the pre-release edition of *Virtual Reality & Immersive Storytelling: Designing Experiences That Engage, Educate, and Inspire*. Apply its ideas and contribute images, insights, and creative work.

Publication inclusion follows editorial decisions. Included contributors receive credit and a copy of the published book.

PEOPLE / PLACE / POSSIBILITY

A research environment. A coastal home.

Meet SENAI CIMATEC researchers and industry professionals across fields, from history to automotive technology, AI, and quantum computing. Each discipline represented in the group will meet at least one relevant expert.

CIMATEC Park is home to Ford's Development and Technology Center. Explore an industry-connected ecosystem; specific visits will be shared as arrangements are confirmed.

English is part of the learning environment. CIMATEC offers English-taught classes and hosted SVR in 2025. Dr. Siqueira's Summer 2026 Technology Frontiers for Industry 5.0 course brought UF and Brazilian students together. Program support includes bilingual coordination.

Praia do Forte: village life, beaches, and sea turtle conservation.

Eight weeks at Praia do Forte Hostel. Shared double rooms with private bathrooms for every student, with breakfast included. Experience Bahian food, music, dance, and coastal life, with Projeto TAMAR nearby.

Cultural experiences may include capoeira, drumming, dance, Balé Folclórico da Bahia, and Ilha dos Frades. Activities depend on the final schedule.

PLAN YOUR SUMMER

Your next step starts here.

UF in Brazil - Cross-Cultural Engineering and Immersive Technologies for Industry 5.0

UNDERGRADUATE

\$9,487

GRADUATE

\$9,597

Dates: June 6-August 1, 2027. Apply by: February 1, 2027.

Eligibility: UF students from all majors; 2.5 GPA and good standing.

Courses: Culturally Aware Design + Virtual Reality for the Social Good.

Credits: Three credits per course; six UF credits total.

Included: Eight weeks of housing, tuition for six credits, all breakfasts, welcome/farewell dinners, program transportation, accommodation on scheduled excursions, international health insurance, and emergency medical assistance.

Budget separately: Airfare, other meals, applicable visa documents, personal travel and expenses, and trip cancellation/interruption insurance.
